## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 7/28/2004 has been considered.

### ***Allowable Subject Matter***

2. Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach the hybrid electric powertrain as recited in claims 1, 4-5 and 9, which include a generator torque reaction brake means for anchoring a generator when the electro-mechanical power flow path is disabled and a slipping clutch mechanically connecting a torque reaction element of the gearing to the generator whereby a mechanical power flow path from an engine to the power output member is maintained when the electro-mechanical power flow path is disabled. This recitation, in combination with the rest of the recited elements, clearly defines over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Downs discloses a reverse one-way torque converter clutch, Tamai et al. disclose a hybrid electric drive and control method therefor, Severinsky et al. disclose a hybrid vehicles, Stridsberg discloses a hybrid powertrain.
